

Health, Safety, & Environment Policy Statement

The health, safety and protection of our employees, the environment, and the communities we operate in, are our priority. Occupational injuries, illnesses, transportation incidents, and environmental issues reduce employee morale, community and client relationships, and the financial effectiveness of the company.

It is the policy of Usher Oil Company to operate in compliance with all Local, State and Federal Health, Safety and Environmental rules and regulations.

To insure continuous improvement and be a leader in industry performance, Usher Oil Company will perform internal audits and conduct quarterly assessments of Usher's performance against industry standards, and internal goals and objectives.
